Credit Card Information Required

Due to the fact that Cada Pools and Spas will only be at your residence to perform the Weekly Maintenance services one-time a week after the Get Swim Ready service has been completed; the following is what is expected of the pool owner during the remainder of the week. If any extra day is needed during the week it will be billed accordingly.

1. Cada Pools and Spas is not responsible for pool water level. As we are on a very tight schedules, we do not have time to fill up pools with low water levels.
2. Mother Nature, such as excessive rainstorms, can negatively change water chemistry. After every heavy rainstorm, please add 1 lbs. of granular chlorine per 10,000 gallons along with a Bioguard Angry Egg and 1 bottle of algaecide. Rainstorms can also affect the pH and alkalinity levels. **(Please be mindful of weather conditions)**
3. If you have excessive swimmers/parties, please sanitize the swimming pool or spa before and after to help maintain proper water chemistry.
4. Due to time constraints, Cada Pools and Spas is not responsible for dirty auto-covers or pool cleaners (automatic Dolphin, Polaris, etc.). **We would be more than glad to clean your cover properly as it would be a separate service call.**
5. Dogs carry a large amount of debris and bacteria on them. **(1 Dog = 10 Kids in Water)**
6. Cartridge Filters are required to be replaced every 3 years and sand should be changed every 3 years to reduce high chemical usage and maintain water clarity.
7. Cleaning of slides, decking, stairs, or diving boards.
8. Cleaning of cartridge, sand, and D.E. filters. (We do offer cleaning services which are billed separately.)
9. Cada Pools and Spas recommends that you avoid fertilizing any grass around swimming pool. Fertilizer contains ammonia that can eat up chlorine levels very fast and can also require large amounts of chlorine to fix.
(Please be mindful of any landscape work being done and letting us know so we can eliminate any delay in swimming)
10. Lawn clippings; mulch debris, leaves, and deceased animals in skimmers contains chemical compounds that can lower chlorine levels as well.
11. Pump must be running for 24 hours to maintain water clarity.
12. Metal Traps are highly recommended for any customers that are on well water or have high amounts of iron in their water. If you are on a well and add water please add 1 bottles per 10,000 gallons of Pool Magnet Plus
13. Scheduling service calls, opening dates, and closing dates.

We cannot be responsible for delays due to weather or ground

I hereby authorize Cada Pools and Spas to perform maintenance services. I agree to pay accordingly to the terms outlined in this agreement. I authorize Cada Pools and Spas to contact me for my credit card payment information. I authorize Cada Pools and Spas to maintain my credit card payment information on file and charge my credit card after each individual service visit \$125.00 or less. I understand that service will be suspended if account is not current within 30 days.
